Available in Phenolic or Epoxy

Peg Detail
Available in White or Black Polypropylene

DETAILS:

Epoxy resin and lab grade solid phenolic pegboards can be installed on walls, uprights and columns to provide a vertical drainage/drying space for lab glassware such as test tubes, beakers or bottles. Pegboards / drying racks support glassware with specially designed "no twist" 2-prong polypropylene pegs set at a 30° angle for maximum support.

A 2" [51 mm] wide stainless steel drip tray and tubing are included with all pegboard sizes. Stainless Steel trays are available to order separately if needed.
